

# Birthingstone Bracelet

## Materials:

- [LF45 Mini Disks](#)
- Frit to Create Birthstone(s) of Choice (see **Page 2**)
- Suitable Glass Separator/ZYP
- Frit Placement Tools
- Metal Bracelet (see **Image 4**)
- E6000 or Similar Strong Adhesive

Birthingstones can be a fun and beautiful way to express yourself or remember someone or some time special to you. See **Page 2** for more details on how to create specific birthstones with fused glass, and for a few meanings behind each stone!

Begin by treating the mold well with suitable glass separator. We recommend spray-on ZYP. **Remember to always wear a mask if using spray-on separator.**

Fill up the mold cavities with different frits and Dichro pieces depending on your desired birthstones (**Image 1**). To make the ones shown here:

- **April/Diamond:** Nip small pieces of Clear Dichroic (**Image 2**) and place them into the selected cavities. Cover the Dichro with F3 Clear.
- **October/Tourmaline:** Nip small pieces of Clear Dichroic and place them into the selected cavities. Mix some F3 Sapphire, F3 Citron, and F3 Pale Purple together in a small cup, then cover the Dichro in these cavities with this frit mixture.
- **December/Blue Topaz:** Nip small pieces of Clear Dichroic and place them into the selected cavities. Cover the Dichro with F3 Blue Topaz.

Once all your frit is in place, use a soft brush or similar tool to gently sweep the frit away from the mold edges and mound it towards the center of each cavity (**Image 3**). This helps prevent burrs and sticking.

Place the filled mold on a level shelf in the kiln and fire using the suggested schedule in **Table 1** or your own preferred Full Fuse.

After your beads have fused and cooled, give them a gentle wash with water to remove any residual separator. Apply E6000 or a similar adhesive to the flat sides of each bead and press them down onto the links on the bracelet. Allow your adhesive time to dry completely before wearing.

The bracelet pictured here is called a Silver Round Disc Bracelet

**Table 1: Full Fuse\***

Seg.	Rate	Temp (°F)	Hold
1	275	1215	45
2	275	1465	05
3	9999	950**	60

\*\*If using COE90, adjust this to 900°F

\*Before firing, it's important to know your kiln to see if you need to adjust our suggested schedules for your use. For tips on how to do that, [please click here to see our Important Firing Notes!](#)

# Birthstone Examples

January

**Garnet** - Protection and vitality  
Frit: Cherry Red

February

**Amethyst** - Healing and spirituality  
Frit: Pale Purple and Dichro

March

**Aquamarine** - Peace of mind and mental clarity  
Frit: Sky Blue, Sea Green, and Dichro

April

**Diamond** - Strength and purity  
Frit: Clear and Dichro

May

**Emerald** - Memory and clairvoyance  
Frit: Light Green and Dichro

June

**Pearl or Moonstone** - Passion and wisdom  
Pearl Frit: White and Dichro (dichro side up on top of White)  
Moonstone Frit: Sapphire and Dichro

July

**Ruby** - Strength and calmness  
Frit: Two parts Light Cherry Red, one part Yellow and Dichro

August

**Peridot** - Protection and Positivity  
Frit: Two parts Citron, two parts Yellow, one part Light Green and Dichro

September

**Sapphire** - Enlightenment and harmony  
Frit: Two parts Navy, one part Sky Blue and Dichro

October

**Opal or Tourmaline** - Magic or creativity  
Opal Frit: White and Dichro (dichro side down on top of White)  
Tourmaline Frit: Two parts Sapphire, two parts Citron, one part Pale Purple and Dichro

November

**Citrine** - Healing and happiness  
Frit: Two parts yellow, one part Pale Amber and Dichro

December

**Blue Topaz** - Wealth and long life  
Frit: Blue Topaz and Dichro
